

Things to add to the MM/1 Minibus Prototype.

- \_\_\_ 1) Red LED\* - And Label it "Pos 5V"  
Yellow LED - And Label it "Pos 12V"  
Blue LED - And Label it "Neg 12V"
- \_\_\_ 2) Change the word "ATX" to "Ver 1.5 - ATX"
- \_\_\_ 3) Move the Label H1 to the unlabeled hole
- \_\_\_ 4) Rotate the Labels: H1 - H3 to the horizontal position
- \_\_\_ 5) Label the power connector - PS1
- \_\_\_ 6) Label Pin 1 on the PS1 connector - with a Arrow and PIN 1
- \_\_\_ 7) Label Pin 12 on the PS1 connector - PIN 12
- \_\_\_ 8) RN3 & RN4 should be spaced the same as RN1 & RN1
- \_\_\_ 9) Remove the J1 Label
- \_\_\_ 10) Add a 2 pin header for connecting the PC case's On/Off Switch and wire it to PIN 16 and GND  
And Label it - PSW
- \_\_\_ 11) Add a date to the back of the PCB: xx/xx/xxxx
- \_\_\_ 12) Add the supplier of the board to the back of the PCB
- \_\_\_ 13) Change the Green color to White and the White text to Black
- \_\_\_ 14) Change the PS1 connector to a Right Angle one

\* - with the correct resistors.
